

WAVE REPAIR

Last updated: December 2007

Wave Repair, version 4.9.2, \$30 to register. The download program runs as a demo for 30 days. Upgrades are free to registered users.

<http://www.waverrepair.com>

The download file name is wr492install.exe, file size is 3 MB.

You can also download the User Manual: wavrep.pdf, file size is 373 kB.

Wave Repair did not do a good job on sdemo1. In fact, using the “auto” mode made the noise worse. This program does contain a lot of useful tools for manual declicking but that’s a lot of work and is unnecessary when other software can do the clean-up so much easier and faster. This evaluation was using version 4.8.7. I’ll give 4.9.2 a try and if it works better, I will report it here.
