

WAVES RESTORATION BUNDLE

Last updated: December 2007

Waves Restoration Bundle (X-Click, X-Hum, X-Noise and X-Crackle), version 5. \$1200 to license from *Waves* but I have found a street price as low as \$720. as a “December Special” from Sweetwater: www.sweetwater.com. And it is commonly “street priced” at about \$900. (Not inexpensive but perhaps affordable.) We have not licensed this software and probably won’t with all of the pretty good restoration programs that we already have. These are Direct-X plug-ins – please look at the information in *Noise Wizard*. Apparently the download trial version is no longer available as I could not find any mention of it on their web site.

<http://www.waves.com>

The trial version performed excellently on *sdemo1* and on all the other files I tried it on. So this could be a “best buy” if you are serious about music restoration. Of course, you will also need a host platform to run the plug-ins.
